Title: IEEE 802.11ad Vs Wireless HD Comparison Study Base on Video Streaming

Authors: Gondi Abd Elrazig Said and Professor Amin Babiker Abd Elnabi

Abstract: There are two competing standards for 60-GHz applications: Wireless HD and IEEE 802.11ad. Both target the short-range video transport market that provides products to connect HDTV sets, set-top boxes, DVRs, games, and other video devices capable of streaming uncompressed HD video over a short range in this paper we give an a Comparison study for both technologies.

Keywords: IEEE802.11ad, Wireless HD.
